I am writing to express my profound opposition to allowing any gas or oil drilling that will impact the Coastal Plain. This land holds much value as ancestral land to the Gwich'in people. It is the calving grounds for the Porcupine Caribou Herd. This land is nesting ground for countless species of birds. As an American citizen, this land also belongs to me. It does not belong to any oil or gas corporation.

This is sacred land. Do not destroy it because of greed!!!!
