Dear B.L.M. Thank You for your consideration. Please do not allow drilling in the ARTIC NATIONAL WILDLIFE REFUGE ! If the administration is focused on drilling, when most if not all of economist's say there is already a glut of supply at this point, then the lower 48 is by far more promising . Ms. Murkowski's claims are EXTREMELY off according to recent historical lease sales data. The Wildlife Refuge is Pristine beyond comparison, home to the most critical habitats on the Planet. Agreeing with nearly all scientists, the majority of the public, locals of the region, even the Pope, the public response will be overwhelmingly huge if this is allowed. The damaging lessons of the past are hopefully learned. Please do not drill in the Awesome Grandure of the Artic Wildlife National Refuge. Thank you very much.
