Dear BLM:

I'm writing to urge the BLM to oppose any effort to open the Arctic National Wildlife Refuge to drilling for oil or any other fossil fuel extraction. Protecting the ANWR will prevent the extinction of many species and slow a dangerous climate change.

We're in the midst of the sixth great mass extinction in the history of the Earth, and much of this tragedy has been caused by short-sighted, irresponsible human actions. The ANWR is a refuge for many species of wildlife, so protecting this area is key to preventing further extinctions.

I'm a meteorologist with two degrees in atmospheric science. The great majority of the most qualified scientists in my field of study believe human-caused greenhouse gas emissions are responsible for a dangerous climate change and that urgent action to reduce these emissions is necessary to avoid the worst impacts. Keeping ANWR oil/fossil fuels in the ground will slow this dangerous climate change.

Please cancel any plans to drill for oil or extract any fossil fuels from the ANWR. Thank you.

Sincerely yours,

Kevin M. Crupi
