This is wrong on so many levels. The area is called the Alaskan Wildlife **REFUGE** for a reason! Drilling there defeats the entire purpose. It *won't* "ensure our economic & energy independence"! The only way to do that is to invest in clean, renewable energy production, such as wind & solar. Don't destroy the area to prop up an industry that's destroying the livability of our planet while lining the pockets of the greedy petrochemical industry's pockets!
