To develop ANWR's oil reserve is an insult on any intelligent mind. European countries strive to eliminate fossil fuels, because its not necessary? Climate changes is affecting people all over the world. Is the Trump administration enjoying life in blissful ignorance? Was the protection of these lands over the last decades just a fling? Once again does the white men show nothing but disrespect towards indigenous cultures. The individualistic attitudes of the United States are antique. Green energy is an up and coming business. There are no advantages in developing ANWR to anyone other than the oil industry! The government needs to stand up against them taking advantage of us the people. The government should be presenting our interests! This is not democracy!
