Dear Friends,

Please do all you can to block drilling in the Arctic Refuge. I am just back from visiting this beautiful area of Alaska and feel strongly that we need to protect this precious wildlife and birding habitat. We need to keep some areas wild. Numerous birds, including Trumpeter Swans and Sandhill Cranes nest here and over 20,000 caribou calve here.

Are you aware that less than 30% of the oil pumped from the Arctic is sold domestically and most of it goes to China? Is the corporate greed worth destroying land and habitats that are supposed to be protected?

Please keep all National Park Lands and Refuges free from drilling.

Elizabeth Cumby, MD
