Hello,

I am writing to express my opposition to any further oil and gas development on the coastal plains. I visited Prudhoe Bay in 1998 and was sickened by the impacts of the development on the native populations of people and animals. We don't need and can't afford investment in fossil fuels. The ecological and social costs will effect too many generations to come, and we need to recognize this before it's too late. For our children and theirs, for other species there and across the planet - DO NOT DEVELOP THE COASTAL PLAIN!!!

Sincerely,

Jack Dant

Santa Fe, NM
