Really--we do not need to continue to push for drilling in a place that is not conducive to this activity plus the MAJOR disaster that will occur--the oil industry continues to push for drilling in place that are saved for future generations. You need to say NO--President Trump and his friends are out to destroy all of the places that I hold dear and will not stop until there is nothing left for us to enjoy in this country. The United States has always protected areas for future generations to enjoy or to keep a place wild for the wildlife that needs the area. It is a shame that the BLM is willing to go along with these crazy schemes. I and a lot of other Americans have said NO and still we are bombarded with a hurry up mentality to destroy to gain nothing in return. Oil prices will not drop so gas at the filling station will not drop.
