Dear Secretary Zinke,

I am writing today to urge you NOT to sell leases for oil and gas drilling in the Arctic National Wildlife Refuge (ANWR).

For so many reasons this would be a unfortunate and potentially disastrous decision. I hope that you will listen closely to the country's experts on environmental policy and climate science and make an effort to fully understand the implications of your decision.

Future generations will be better off without fossil fuel development in ANWR.

Sincerely,
Jeff Davlyn
