I would like to express my extreme concern for the continued protection of ANWR and for the species that live there and for future generations. It is not a place for oil and gas drilling - not now and not ever.

The oil and gas industry has a massive surplus of oil and gas leases and permits in the Lower 48. The United States needs to work on curbing the addiction of oil and gas usage for fuel. We should not be a nation that trades away our children's future for reckless, shortsighted political gimmicks. The last truly wild places on earth need to be protected for all in the world.
