This will be a NATIONAL TRAGEDY.

I strongly oppose drilling for oil in one of America's most pristine environmental regions. You are destroying the experience of millions of American - and foreign tourists.

So you will drill for oil, benefiting the petroleum industry.

But what about the TOURISM industry? Does that not matter?
What about the marine life in this region? Does that not matter?
What about the impact on Climate Change? Does that not matter?
What about the impact on the local population in Alaska? Does that not matter?
What about the impact on fishermen in the region? Does that not matter?

You have a social and moral responsibility to stop this initiative. The world is watching.
