ANWR is one of the largest intact ecosystems remaining on Earth and is one of the most valuable pieces of our nation's environment. We must not damage one of our last great wild places.

If are going to prevent making our planet inhospitable and even uninhabitable, we must leave petroleum products in the ground and reduce our use of polluting oil & gas. We must develop environmentally sustainable ways to live on Earth.

Alaska has been my home for 65 years. I absolutely oppose oil and gas development in ANWR.

sincerely,

W.Elsner
