Have never been to ANWR, but have seen many shows on TV – and it is appears over the top beautiful

Why spoil it ????????

With Pruitt destroying the mission statement of the EPA, they figure it will be necessary for more oil!

Call me naïve but 50 years ago we put men on the moon with technology our smartphones

Have more capabilities than the lunar vehicle – come on !!! there must and are ways

To lessen our carbon footprint

But for the idiots, morons, etc in DC it is a very 'short sided' vision – care about now!!!!

STOP ALL OF IT

Hope native Americans in Alaska will sue forever!!!!!!!!!!!!1
