Dear BLM Coastal Plain Oil and Gas Leasing EIS Team,

I hope the EIS accurately documents the full spectrum of impacts to the Arctic National Wildlife Refuge of the proposed lease of at least 400K acres for oil drilling. The tremendous impacts far outweigh the relatively minor, short-term economic benefits and the proposal should be withdrawn. This assault on the critical habitat of many wildlife species and the subsistence activities of indigenous people is completely unacceptable.

The massive surplus of oil and gas leasing permits on federal acreage makes the proposal for drilling in ANWR unnecessary, reckless and an obscene misuse of a rare, unspoiled area of our increasingly human-altered planet. The justifications for oil drilling in ANWR are completely refuted by sound natural and cultural resources management, and scientific and humane response to climate change. I hope the Bureau of Land Management will take the most ethical course forward, as a federal agency that models the highest standards of land stewardship.

Sincerely,

Susan Dolan
