There are many reasons for not drilling in ANWR. Some are listed below:

- The area to be leased is brimming with wildlife: calving ground for caribou, denning habitat for polar bears and home to more than 200 species of migratory birds.
- Right now, the oil and gas industry has a massive surplus of oil and gas leases.
- Drilling will include development of roads, required infrastructure and likely spill(s) that would cause irrevocable damage.

ANWR is one Of the most sensitive and pristine places on earth. It is no place for oil and gas drilling - not now or ever!
