To: blm_ak_coastalplain_EIS@blm.gov

I am opposed to all drilling in wilderness areas.

It is important to respect the land, and the damage environmentally we cannot recover.
Please stop putting the \$\$ and economic development before environmental care.

We can never return the land to its pristine state. Rather, all we do is pillage and plunder.

The polar bears are already loosing their habitat due to climate change. This only works to expedite.

Please be foresighted in your management, rather than only in terms of dollars a company can make by exploiting the land.
