To: blm_ak_coastalplain_EIS@blm.gov

The long-term impact on the environment and on native villages is but one of the many important issues indicating that lease of public lands for drilling should NOT proceed. There is not an economic reason as the oil & gas industry has a massive surplus of oil and gas leases and permits.

It is also known that development requires a web of roads, requisite infrastructure and inevitable spills causing irrevocable damage to one of the most pristine places on earth.

Please stop this potential LEASE.
