Dear Secretary Zinke:

OK request that you protect the Arctic national wildlife refuge and the millions of nesting migratory birds and 200,000 animal caribou herd residing in the Arctic national wildlife refuge by refusing to open that land to oil and gas leasing! The wildlife is too precious to sacrifice. The time to invest in alternatives to rampant drilling has been here for some time.

Please use your position of power to support wildlife protections, not short-sighted greedy energy czars' pocketbooks. Thank you.
