Please don't allow this unique and valuable place be opened up to industrial exploration. We and the gwitchen people have too much to lose. And oil spill or pluck pipeline leak in this cold unique environment will be almost impossible to totally clean up. The porcupine caribou herd is too valuable to risk there caffeine area. Please just time to look for other fuel sources anyhow and as an Alaskan I really want my state to get off the boom-and-bust economic Cycles that come with oil development.
