I am against any oil drilling, oil development and oil exploration in the Arctic Refuge. The Arctic Refuge is a pristine untouched place. A place where animals go to have their young. It needs to remain untouched by humans and to be untouched by the greed of oil companies. We cannot destroy the Arctic Refuge for a few months of oil and money. The Arctic Refuge is a sacred place for my Indigenous people. Our way of life depends on the animals that give birth to their young there. We as a nation need to find alternative clean energy. Protecting untouched ecosystems and birth places of animals must be preserved for future generations. Our planet is suffering. Stop oil drilling in the Arctic Refuge! Protect the Arctic Refuge!
