I am trying to refrain from an all caps "Are you kidding me!" response to your department's plans. The word "refuge" means just that—a place of safety and protection. And our government wants to destroy all that?

There is nothing responsible about drilling for oil in that region. We have enough safe resources if the government would allow and encourage those to be developed rather than exposing sensitive areas to "meet our nation's energy demands ."

As well, the ANWR is already being subjected to enough external assaults because of the current administration's anti-environment stance. Can't our leadership care about anything besides economic gains and over-indulgences?

Give the ANWR a break instead of breaking it down completely. Be responsible for our world and it's fragile environment please.
