To: blm_ak_coastalplain_EIS@blm.gov

To the Bureau of Land Management:

Please do NOT allow fossil fuel, mining, lumber, or other commercial enterprises to ravage the Arctic National Wildlife Refuge. This area is unique and provides sustenance for indigenous Native Americans and a large variety of wildlife.

Climate change is already harming animals and destroying habitat. Sea ice that polar bears use for hunting is melting and these animals are starving and dying. Other animals are suffering from the negative impacts of climate change as well.

Human beings have a responsibility to protect other forms of life on earth, not just our own. It is the incredible diversity of life on earth that makes our planet rich and healthy. We cannot allow the greed and indifference of man, as exemplified by the Trump administration, to destroy our environment, wildlife, and the health of our planet. We are all part of a larger life system on earth. All life is ultimately interdependent upon each other.

Don't be short sighted. Please protect the unique and undamaged Arctic National Wildlife Refuge from more of man's greed and exploitation. Commercial interests can only cause harm to this irreplaceable region. Thank you!

Sincerely,

Susan Fong and Family, [1604 Eaton Drive, Las Vegas, NV 89102](#)
