Re: the Alaska Nat'l Wildlife Refuge oil and gas drilling: This refuge is Home to so much wildlife in tough environmental conditions. The native community relies on the refuge for their subsistence and their cultural life.

There is a danger of destroying this environment by leaks, by transportation, by destruction of the environment of the pipeline or of the ships carrying the product away, by all the infrastructure that has to be put in along with the drilling. I just see NO JUSTIFIABLE REASON to destroy this area in order to drill for oil or gas.

Please do not allow drilling in this wildlife refuge area.
Thank you.
