Hello,
I understand there is public comment until June 19 re: ANWR oil drilling.

PLEASE, NO. This will NOT solve oil our oil and energy problems and it cannot be done without significant environmental impact (per US Fish and Wildlife 2015 review), and it is not cost effective.

At a time of polarization of our nation and culture, NOT drilling has actually had bipartisan support for decades. Let's NOT fracture something we had agreement on.

I believe I speak for many in the silent and middle-of-the-road majority who would like to see us do the right thing by the environment, our children, and our future.

Thank you,
Kristine Ewing
