

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

WAYNE OTT

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Eric Bell

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

The clear dangers of leaks, spills, and massive pollution should be enough to stop you, along with the difficulties of extraction in this location. Reconsider the realities of what you plan to do, and how long you will have to use your ill-gotten gains to bribe politicians and live in a world where your actions will hasten the likelihood of total destruction of it all. What would that be worth to you?

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

USA Citizens DO NOT WANT the Arctic National Wildlife Refuge open for oil and gas drilling.

It is important to us.

The value this pristine place has far exceeds the need some corporations have to make money while DESTROYING IT.

Diversity is the KEY to a healthy planet - and the blow to diversity that drilling would make is terrible and not inconsequential.

Who will suffer?

The Gwich'in people of Alaska and Canada, and future generations of Americans who will never know this NATIONAL TREASURE.

What animals will be killed with habitat destruction?

Polar bears and Porcupine Caribou among many others.

How will the planet suffer?

CLIMATE CHANGE, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate. WATER POLLUTION. SENSITIVE COASTAL LANDS.

Beauty will be turned to ugly - and Americans want no part of this. Instead - CHAMPION SUSTAINABLE, CLEAN ENERGY!

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Please listen to the American people.

## Arctic National Wildlife Refuge

It is outrageous that the Administration is promoting the opening of a premier National Wildlife Refuge to resource extraction! The whole point of these "REFUGES" is to preserve them for wildlife, in perpetuity!! It is NOT to provide short term windfall profits for a few petroleum and gas executives. I am appalled. This particular refuge was established by Republican Dwight D. Eisenhower. It was to preserve this remnant of wildlife habitat for future generations, not to fuel SUVs for the current passing generation.

I strongly urge you NOT to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jackie Pamentor

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urgently ask you not to open the irreplaceable Arctic National Wildlife Refuge for destructive oil and gas drilling through ill-conceived, shortsighted, unconscionable governmental schemes.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Destructive oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. America must not continue blindly to lease federally-protected public lands without considering the dire impacts to our climate, the people, the land, and the wildlife.

Rushing to sell off one of our nation's most treasured public lands is irresponsible and reckless. The administration needs to comply with all the vitally important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge will be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history. These actions are completely unacceptable to the American people and must be stopped now.

I profoundly oppose wilderness-decimating oil and gas activities in the Arctic National Wildlife Refuge. I stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations, for the good of the country, and for the safety of the climate.

Thank you for your consideration of my letter and for your right moral action to preserve the Arctic National Wildlife Refuge and to protect the climate.

Sincerely,

Holly McDonald

8691

## Arctic National Wildlife Refuge

It is time for Humanity to WAKE UP and GROW UP and Become CONSCIOUSLY RESPONSIBLE in Our Relationship to this Planet and All Earth's Life Forms... Of course NO NO NO to drilling Anywhere on Earth AnyMore! UNNECESSARY Horrifically damaging to the ecosystems and ultimately to All of Us! There is available FREE ENERGY RESOURCES NOW!! USE THEM!!!

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Mr. and Mrs. E. R. Adams

481300296

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Maureen Foss

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Greg Winton

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations. It is also much harder for microbes to break down oil in the frigid arctic regions than in the warmer regions such as the Gulf, so that the damage caused by spills will be much more destructive and long lasting there.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Kristine dickson

786542131

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Edd Manges

707882611

## Oil and Gas Development in the Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling. These public lands are too important for wildlife, indigenous and local communities, outdoor recreation, and ecotourism.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous peoples.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country, something that is especially harmful to polar bears, who depend on solid sea ice to hunt seals, their main food source. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Thank you for your time, hard work, commitment, dedication, consideration, and cooperation on this critical environmental protection, wildlife conservation, and indigenous rights issue.

Vikram Seetharaman

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Protect (not Destroy) the Arctic National Wildlife Refuge

The Arctic National Wildlife Refuge needs protection, not exploration for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Dennis Choptiany

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Ellen Simpson

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Susan Crowley

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Linda Freiband

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Nikki Hendricks

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

The Arctic National Wildlife Refuge must never be open for oil and gas drilling. It is priceless, and oil is over - it's time to move forward into a future that is not dependent on fossil fuels. It is time to wake up.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Patricia Willenborg

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jill Morgan

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Christine Ritchie

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Daniel Salmen

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Danielle Spitz

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

Greetings,

I am a college student studying Biology and Environmental Science, I am immensely saddened along with many others by the fact that we are currently in the sixth major mass extinction even on Earth. This one is human-caused. Please consider how drilling in the Arctic will impact human, animal, and plant communities now and in the long run.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Fierce love and tender prayers to you and your family

Lilyanne Price

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Elena Sparrow

Oil industry already has it's hands into the sensitive wildlife habitat of NPRA. Isn't that enough? please leave ANWR alone. All the oil in ANWR would meet US demand for about one day, or so I have heard. That is not enough to justify the desecration of the coastal plain of ANWR. Trump is beholden to the oil industry for some baffling reason and he's doing this just to stick it to the Greenies. Thanks alot Lisa Murkowski!

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Petra Wilder-Smith

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Francine Traniello

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Sabrina Fiodorow

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Richard Swift

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Georgiana Keable

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

James Stout

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

## Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

David Delagarza
