I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Steven McCoy Jr

328285215

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Kimball Hurd

950049713

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jennifer Clark

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Chris VanDerhoof

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Adell Schisler

37042

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Vicki Pollard

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Kristi Dean

919013040

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Peter Zanello

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rick Klink

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

William Heuser

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Once destroyed or even partially damaged, the environment there cannot recover. Additionally, thawing of the permafrost releases carbon and gases that are rendered inert because they are locked in ice. Go be stupid somewhere else.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

As a US born voting citizen I demand you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

Just who do you think you are? U lied 2 us n ur campaign

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Mark Cohen

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Micah Volborth

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jacalyn Dinhofer

I strongly urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

Have you already forgotten about the Exxon Valdez disaster? It is still not cleaned up

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I vehemently oppose oil and gas activities in the Arctic National Wildlife Refuge or anywhere in the World and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Viswanatha Juvvala Reddy

917111567

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

As someone who has visited Alaska and has seen the beauties of terrain and its wildlife, I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

We are currently drowning in natural gas as a consequence of the fracking boom, and we must transition to renewable energy as soon as possible for the future of ourselves and our planet. Given that, it makes no sense to permanently destroy one of the most beautiful places on Earth for absolutely no reason other than corporate greed.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the native people, the Gwich'in, to demand that the coastal plain of the Refuge remain protected for future generations.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Alan Marshfield

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Deb Putman

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Gary Cook

606052356

Arctic National Wildlife Refuge

I urge you to not open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We must not continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Becky Jovingo

44708

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Doug Manley

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rodney Palmer
