Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

C Cavalli

10044

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Briony Plant

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

The last vestiges of Creation are at your mercy. I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Franceen King

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jackie Hollman

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Ann Iverson

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Joseph Falkenstein

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Judy Turetsky

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Thomas Allen

2825

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Mary Fernandez

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Michael Giorgi

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Gabriel Thoumi

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Michael Dulock

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Gretchen Patey

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Patricia Okoumou

10301

Arctic National Wildlife Refuge

Please do not allow the Arctic to be destroyed. I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Julie Bennett

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Andrew Devine

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Eleanor Snyder

834673503

Arctic National Wildlife Refuge

Don't do it! It can't be reversed.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Raymon Grossman

607121021

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Nancy Webber

907316035

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I hasten to preface this urgent message with the truth that there are a number of moves and promises on the part of the Trump Administration that I like, and liked from the start. But such disregard for the relationship between nature, the earth, the oceans, the air, and humanity is not one of them.

The President wants businesses to think for themselves and your business is to limit further damage to the rapidly melting poles and implement consumer-friendly strategies. But you cannot get to the latter without determining the former. This is why we urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Robert Wodruff

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

900065235

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

94585

MA

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

851181811

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

DANIEL HIGGINS

2170

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

David Stan

97540

CA

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

Rushing to sell off one of our most treasured public lands would leave a destructive legacy for you and your administration. Your administration can take pride in complying with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history. Do you want that to be part of your record?

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations. I hope will too and use your power in this positive action!

Kathryn Gaianguest

4605

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Laurent Cloiseau

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Betsy Blew-Ochoa

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Dennis Kreiner

601101201

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.
