

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Sherri Hodges

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Fred Reim

PROTECT the Arctic National Wildlife Refuge

Let's cut to the chase: is NOTHING safe from Trump's greed??? DO NOT open the Arctic National Wildlife Refuge for oil and gas drilling. PERIOD!

I don't need to tell you all about the importance and vulnerability of the Arctic ecosystem. You already know all that.

Now I'm just asking you to do the job that your constituents elected you to do---PROTECT the safety and interests of all Americans, including protecting this precious environment!

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Charles Evans

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Emily Stewart

320807235

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Michael Moccio

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Mario Leal-McBride

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Dan Willems, Sr

Arctic National Wildlife Refuge

This area is called a refuge for a reason; there are indigenous people and wildlife that need to be protected from assault from the outside world. The Arctic is already stressed from climate change, drilling and oil exploration will hasten its deterioration and loss of wildlife and their habitat.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Judith Woolsey

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Laurie Collins

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Mary Drabbs

87109

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Judith Carlson

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The natural legacy, present cultural value, future potential impacts, and historic importance of this place far outweigh any short-term so-called gains from exploration for fossil fuels.

The "greatness" of our nation is founded upon our ability to recognize inherent value and choose wisely how we occupy our landscape. It is founded upon our ability to make decisions that are resilient in the context of longer term goals--natural and cultural preservation, long term health and sustainability of communities, etc.

Promoting fossil fuel exploration in this region will not only cripple critical local systems, both natural and cultural, but it will cheapen the legacy of this nation as a leader and forward thinking entity in a global sense.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

SUSAN MADERER

100255279

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jerry Greenstein

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Sarah Williams

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Cynthia Parker

852480001

Arctic National Wildlife Refuge

Keep it pristine!

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Richard Clough

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Marilyn & Gord Harris

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Alessandra Giannini

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Paul Gregory

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Teresa Miller

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

MD

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Deb Mullen

Leslie Smoot

357638622

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling. Oil and gas drilling can harm this very fragile ecosystem. The price of oil and gas is already low, future technologies are moving away from these to nuclear and solar and wind and small scale local solutions. This endeavor would scar that region and create more pollution.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Douglas Krok

70662503

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Arctic National Wildlife Refuge

We do not need to open the Arctic National Wildlife Refuge to oil and gas drilling.

In fact, the US now has the ability to break our addiction to oil- our proven technology could lead the world in clean and renewable energy sources. As oil and gas run out, we can be way ahead of the rest of the world in using better supplies of unlimited energy such as solar and wind.

Lets leave the old and dirty ways behind and move on.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

122034474

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Edwin Prof. Dr. Hopkins

44801

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.
