

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

906604737

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Sue Nuccio

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Terry Friedman

76451114

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Brock Dilling

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Kathleen Murrin

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

stephen rohl

Joanna Welch

955014316

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Chris Grill

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Sandra Middour

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Cathy Laughlin

Ingela Magnusson

58726

Arctic National Wildlife Refuge

The arctic is under a huge environmental threat already because of global warming (yes, I believe in science!). This particular area is also yet another opportunity for a white land-grab to the detriment of native Americans. This administration is making it easy for corporations to profit at the expense of people who cannot defend their rights without help. By the time Trump and his cronies are kicked out, our country will be a vast ecological disaster that cannot be remedied. Greed does not excuse the damage done to the country my grandchildren will inherit. I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Janice Hibbard

152262606

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Darlene Falk

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Marjorie Browning

856027822

Arctic National Wildlife Refuge

Opening the Arctic National Wildlife Refuge to oil and gas drilling is destructive, corrupt, and unnecessary. We need to do what's best for all the planet's inhabitants, not oil companies and their lobbyists.

Developing solar and wind power, and phasing out fossil fuel vehicles for electrics would eliminate the need for any continued destruction and pollution by the greedy fossil fuel industry.

We also need to eliminate public servants who take money from the industry to do their bidding.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Judy Hundley

Spoiling the Arctic - or any place on this amazing earth - is a demonstration of how our human species has failed to evolve and/or sustain ourselves. This planet is a gift - what is it going to take for us to realize this?

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Carol Hodgman

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

The Arctic must remain pristine for the millions of migrating birds, hundreds of thousands of migrating land animals, polar bears and millions of sea creatures. There is no "fix" for spills and mishaps because weather conditions are too brutal. It is not worth the risk of irreversible destruction, which would be a massive blow for humans and animals.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jesse Green

0

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Protect the Arctic National Wildlife Refuge--no drilling there

I'm writing to urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling. As a U.S. citizen and part owner of this federal land, I want the Refuge to be protected for the benefit of wildlife and future generations of Americans.

I'm also a meteorologist with two degrees in atmospheric science. The great majority of the most qualified scientists in my field of study believe human-caused greenhouse gas emissions are responsible for a dangerous climate change and that urgent action to reduce these emissions is necessary to avoid the worst impacts. Keeping ANWR oil in the ground will greatly aid the fight against climate change.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations. You obviously don't give a damn about the environment. You are a disgrace.

Suzanne Westgaard

0

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Jim Mason

50647

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Danielle Machotka

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Robert Enriquez

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Dennis Conroy

Arctic National Wildlife Refuge

For the short and long term future of your family and mine, I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Alice Piatek

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Robert Schicker

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Regina Brown

298092639

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Clyff Curry

76642

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Craig Brainard

49058

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Arctic National Wildlife Refuge

Any drilling or exploration for oil, gas, or coal is merely a Band-Aid to a serious energy problem. The relatively few barrels of oil we might be able to glean from the destruction of the Arctic national wildlife refuge in no way compares to the sustainability and longevity of finding viable and economically fruitful options using renewable and alternative energies. I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

Willam Hielscher

83703

Arctic National Wildlife Refuge

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.

I urge you not to open the Arctic National Wildlife Refuge for oil and gas drilling.

The Coastal Plain of the Arctic National Wildlife Refuge is of cultural and natural value to all Americans, and especially to the Gwich'in people of Alaska and Canada. It provides denning habitat for threatened polar bears and the calving ground for the Porcupine Caribou Herd that sustains Gwich'in and other indigenous people.

Oil and gas development will exacerbate climate change, which is already causing temperatures in the Arctic to rise at twice the rate of the rest of the country. We shouldn't continue to blindly lease public lands without considering the impacts to our climate.

Rushing to sell off one of our most treasured public lands is irresponsible and reckless. The administration needs to comply with all the important legal protections that are in place to protect caribou, water, subsistence, and other sensitive resources of the Coastal Plain.

Oil and gas activities in the Refuge would be the single most destructive attack on the wilderness, wildlife, and subsistence resources of a national wildlife refuge in modern history.

I oppose oil and gas activities in the Arctic National Wildlife Refuge and stand with the Gwich'in to demand that the coastal plain of the Refuge remain protected for future generations.
