Count me as an Alaskan who is AGAINST drilling in the coastal plain. There are places on this planet that should be kept intact for the future, IF it requires the USE of fossil fuels (in a world awash in them at present).

With new technologies and alternate and clean energy sources, our planet does not need anymore degradation from the acquisition and use of earth/air/water altering mining.

Global climate change should be enough proof of the folly of keeping up the ideas of the last century.

Thank you for letting us state our opinion, Valerie Luczak, Leonard Peck
