To: blm\_ak\_coastalplain\_EIS@blm.gov

To Whom It May Concern:

The Arctic Refuge is NO PLACE for oil and gas drilling! We should be transitioning OFF of fossil fuels, not destroying our planet to find more only to burn them and contribute to the overheating. Is this not obvious to you?

I sincerely hope that common sense can prevail once and for all on this issue so we can move to renewables (not nuclear) asap. China gets it, for goodness sakes! That should be a clue.

Thank you for your consideration,

Jessica Lisovsky
