Dear BLM,

Please do not lease land in the Arctic National Wildlife Refuge Coastal Plain for drilling. It is beautiful, extremely valuable land that must be kept natural for the sake of its wildlife and people who live and visit there. It's so important to keep some land natural so that species can thrive. It brings money from people who may visit, and helps out the environment. If you allow drilling, you will be endangering so many lives, and it's not worth it. There's an opportunity to do a good thing, and you should take it by not allowing people to drill in these beautiful wildlife coastal plains.

Sincerely,  
Serena Levingston
