Dear Bureau of Land Management,

I support the efforts to develop an oil and gas program in the Arctic National Wildlife Refuge. The Department of the Interior must closely examine the science and fully evaluate the impacts at every stage of energy development on the Refuge's wildlife, water, subsistence, and other values for which it was created.

These and other impacts must be evaluated for their effects that will extend far beyond the footprint of any physical development. The Refuge should remain a place in America's Arctic for birds and wildlife seeking refuge from the pressures of climate change and development. The Department must carefully collect the science and consider these issues, which clearly indicate why an oil and gas program does belong in the Arctic National Wildlife Refuge.

Sincerely,

Cameron Lingle

Kalispell, MT 59901
