Hello,

I would very much appreciate you listening to my viewpoint.

The refuge ANWR s one of the last truly wild places on this planet. I believe that it should remain so and that It should remain so without the influence or trace of our species.

If one believes in science, If one believes in maintaining the integrity of place, if one believes that there is reason for truly wild places, then the choice is clear:

LEAVE IT ALONE.

DO NOT DESPOIL THIS PLACE!

Please do not allow this place, a place that has been evolving for millions of years to be despoiled in single generation of the human ape.

The senators from Alaska, Lisa Murkowski and Dan Sullivan, and the senile congressman Don Young are beholden to and only interested in, the big money - take what you can from the earth without recompense, corporations that have no connection to place or people.

This country does not even need the oil that would come from ANWR. It would be sold to other countries, generating huge profits for the big three oil companies.

Sincerely,
Jeff Lebegue
