Dear BLM,

It would be more than a double whammy for the Bureau to open up the Arctic Refuge to oil and gas drilling. To destroy the fragile ecosystem of our northern neighbor is unnecessary, uncalled for, and irreversible. It would not only continue to bring oil and the ensuing carbon footprint into our skies, it would irreversibly bring calamity to an area which cannot tolerate this type of use. NO to selling or leasing ANY of this fragile land. Let's put our energies into lessening our dependence on fossil fuels and eliminating all the collateral damage that comes about because of it. There is no way you can justify the carnage this brings to the immediate region and our Mother Earth as a whole. Along with the immediate negative effects on the flora and fauna of Alaska, this would be another nail in our not so distant collective coffin - yours, mine, our children... We cannot continue at this pace and expect happy endings. Think bigger picture.

So long,

David Leake
