Dear Ms. Hayes,

I am writing to urge you to extend the comment period for the Coastal Plain Oil and Gas Leasing EIS, beyond June 19, 2018. I agree with those who have said the area in question is a sensitive ecological area, and whose wild nature must be maintained for the survival of its native inhabitants, the Gwich'in people. BLM should provide adequate time for people to be informed what is happening and for objections to the project to be raised.

Thank you,

Bruce Larson
