### Comments:

~~I request that you not disclose my identifying information publicly.~~  
The USE of the developed resources thru lease sale MUST be included in the EIS - the impact to our environment is not just the print on the land but ALSO the use of oil & gas etc. Use of oil & gas releases XXX million gases into the air and water which will cause XX degrees of <sup>global</sup> warming, which will cause X feet of water rising & XX million people displaced from coastal community.

Also - by holding this in the middle of the day on a workday - who do you think is going to be able to provide comment? Maybe only those whose EMPLOYERS find it advantageous for them to comment in favor of gas development? Those of us who oppose drilling do not have mega dollars paying for us to be here.

I stand with the indigenous people whose connection to this land is tens of thousands of years old. I am, as you are, settlers, invaders, of this land. They do not consent to this development.

(cont'd on back)

The EIS MUST INCLUDE the full  
impact of lease sales. Including impact  
on PPMillion & global warming.  
Government's role is to plan for the future & act for the greater good.  
Thank you. Please preserve Alaska.
