 Title: Protect our Arctic Refuge

Dear Sirs,

1/7/2019

To whom it may concern at the BLM,

I beg you to deny, forfit, withdrawl, reject, and otherwise stop all pretense that developing the last 5% of the North Arctic coast of Alaska that has not yet been drilled, and has been protected for generations as a National Wildlife Refuge, will be in anywise un-harmful to the ecology and communities that have meritted such a protected designation.

It is absurd to trade one of the last sections of arctic wilderness coastal plain for what amounts to a few months worth of oil and gas in the gloabl market... Especially when doing so no only endangers the birthing grounds of the largest caribou herd left in North America, but the eintire planet through the burning of more fossil fuels which will result in increasing atmospheric carbon and contribute to earth's increasing gloabl temerapture! Do you not know about the climate catastrophe this process is courting? Do you have chilldren? Is this the legacy you wish to leave them; a dead and dying planet? Has the profit-at-all-costs economic model of this administration caused you to lose your mind? This is NOT right under any justification!

Please do all you can within the power God has given you- and holds you accountabel for- to honor the protections over this area and safeguard all of Creation. These protections were put into place for great reason and are not worth jepardizing at such high costs to life on earth!

Be blessed and muster the courage to serve the public good. This is your job! Thank you!

PS: <https://www.ecowatch.com/14-reasons-why-we-must-never-drill-in-the-arctic-1882055454.html>

Sincerely,
David Moen
(and family)
