### Comments:

We are facing an ominous choice: Work for the health and regeneration of planet Earth or continue to consume until we threaten life on Earth. Homo sapiens need to curtail fossil fuel extraction and consumption, or threaten life as we know it. Every person in the military and in the oil and gas economy need leadership to turn and work toward sustainable and green energy. This project plows on towards our demise. There is nothing more important than reducing and eliminating our addiction to fossil fuels. The few places in the world that are untouched are our most precious resources. Leave them to our children. I also believe these communities most impacted, Gwich'in and Inupiat, should be more important than economic interests. People over profits!

No leasing no drilling please,
