Comments:

After studying the EIS I do not believe any leasing should take place until further research is completed concerning the effects of Permafrost melt, seismic activity on denning Polar bears, the effects of that much activity on nesting shore birds, and the effects on calving Caribou due to the narrow coastal Plain in ANWR, further study effects of massive water use in development of carbon resources, and effects of additional carbon output on climate change. Due to these major concerns none of the alternatives are acceptable.
