

To Whom It May Concern,

Feb. 4, 2019
1451 Flat Mtn. Rd.
Fairbanks, AK. 997

I'm totally opposed to drilling in ANWR.

New York City is divesting from all fossil fuel investments for example. Read the writing on the wall. Oil development is as antique as model T cars. Oil's day is over.

The concern that is most urgent is stopping global warming. We can no longer afford to advance in tiny increments. ^{Using} What we have in reserve already puts us past the ^{scientists} 1.5 celcius global warming we have given us to survive. We need BIG CHANGE urgently fast to a green new deal.

It's happening all over - small towns to cities making green energy a priority. Alaska needs to join advanced cities and countries like Europe, Scandinavia, Iceland, Burlington, Vermont, Kodiak Island. Get with it! In the long run everyone will benefit leaving oil in the ground! ie: In Canada where workers were upset at losing their fossil fuel jobs, ^{they} were eternally grateful to get renewable clean jobs!

The honest real owners of the land, the Indigenous people must be regarded first and foremost. You who read this can see your grandchildren enjoy a cleaner world. Please stop all drilling in ANWR.

Urgently, with compassion for all beings,

M. Suzanne Rich
Founder, President, manager of
The Fairbanks Peace Choir
