RECEIVED

March 1, 2019

Good day,

We wish to make public comment on ANWR. We are homesteaders and subsistence hunters, fish and berry gatherers. We have true respect for Alaska's land and resources as they provided for our family for 42 years. We believe:

1. ANWR needs to remain a refuge and a wilderness. Keeping the land intact is essential for the animals and people of the region.
2. Yes, we need jobs in Alaska, but ANWR is not the answer. Alaska needs foster jobs which begin the process of weaning our world from oil. Developing clean alternate energy should be happening now and in the future. We believe climate change is a result of ~~manpr~~ ~~man~~ ~~made~~ man-made spewing of carbon into the atmosphere. It is irresponsible and deadly to continue fossil fuels use. Our Earth is being destroyed.
3. ANWR is the "poster child" for the concept that wilderness does matter and that our neighbors, birds, land animals and fish, have a God-given right to a home which excludes us in the equation. Sincerely

Charlie & Linda Rutledge
