Re: Coastal Plain Oil & Gas Leasing EIS

1/ 25/ 2019

Dear Ms. Hayes,

I write to urge you and your department not to proceed with oil development in the ANWR as referenced in Section 1002. This is federal property that belongs to all citizens. The environmental review was done in a poor, insufficient and hasty manner and does not deserve to be taken seriously. Many of us are committed to looking out for the welfare of other species and know that this property must be protected for now and for future generations.

I am aware of the vast changes that the oil development program would make. This is a change that will have effects forever, starting with all the natural habitat of many species already small in number. We also have a responsibility to respect the lifestyle and culture of the Gwich'in people of this area. Choosing to honor these responsibilities makes us better people, able to respect ourselves more.

Please put a stop to all industrial development, at all, in the section 1002.

Thank you for considering this matter deeply.

Sincerely,

Kaia Svien
