### Comments:

This entire program needs to stop. We're proposing to ruin the lands belonging to people who have lived there for thousands of years, without considering their lives and sovereignty. Honestly, how dare we? A bunch of people who look like me, claiming the right to exploit someone else's home, for the sake of an obsolete technology that is itself destroying our future. Germany is on track to fully renewable energy; they're planning to shut down their remaining nuclear facilities in the next decade. Japan is developing ocean-going OTEC platforms that can harvest solar energy from the ocean. And we're drilling more oil. If we're not the laughingstock of the world for even considering this, we should be.

This is a mistake, and a crime, and an obscenity. Please, in the name of decency, in the name of my children. STOP
