

testify-  
I am From Arctic Villages  
and Venetie, no drilling  
in Arctic Refuge, the  
10-02 calving ground,  
this area is where, the  
Caribou have their Caribou  
calves, the cool air that comes  
into the coast is very helpful  
for the Caribou calves, the cool  
wind keep the mosquitoes away  
the mosquitoes will kill a  
Caribou calf. In the both  
Villages, there is elders, women and  
children depends on Caribou meat. You go  
95 percent of the coast, for drilling. This  
5 percent, Leave it alone. Let us keep  
our Arctic Refuge, the last frontier, on  
It's very important to guide in the
