Comments:

My main concern is the Caribou route down to Arctic Village where people mostly live on Caribou for meat. In the past our elders only live on Caribou and still today we live on Caribou and we will continue. When someone explain the action alternative I finally understood what's it all about. I thought it was a complicated issue. I know the draft right now can change but I wanted our people to understand it fully in both English & Gwich'in. They said it will not interfere with the route that they go for 1000 of years but eventually over the years it might change and as an education I know it will interfere with our culture values and most of all our language.
