

I am an Environmental  
Studies major at U Berkeley  
and I strongly oppose  
oil drilling in the arctic.  
The climate implications of  
oil drilling will be  
drastic and far  
reaching. Please consider  
investing in more  
renewable and environmentally  
conscious energy  
alternatives. you

have the chance  
to make a  
difference & set  
the US on the  
path to total climate  
action. Bold climate  
action means

NO Oil Drilling!

Sincerely

Seriz Vareno
