Hello!

My name is Hillary Junglas and I am currently researching social impacts that drilling in Section 1002 may have. Is there any way to access the comments and records of public meetings that I can review as data inputs for potential social impacts? Is there anyone with an expert understanding of what social impacts drilling in this region would have?

I am hoping to understand social impacts on everyone from the Gwich'in people, the oil and gas employees stationed for drilling and developing the land for drilling, as well as Alaskan citizens who receive payment as a result of oil production in their state.

If there is any help the BLM might be able to provide as far as public comments and concerns, please let me know. I would greatly appreciate any help!

Thank You,  
Hillary Junglas
