Ms. Nicole Hayes,

Your the draft EIS is fundamentally flawed and does not address issues such as the trans-boundary impacts, flawed science on the potential impacts to the Porcupine Caribou Herd and a lack of clarity in terms of mitigation and cumulative effects.

Before you release the final EIS, the BLM must fully address the consequences of drilling on the Porcupine caribou herd and impacts to the livelihood of the Gwich'in who rely on the herd. Further, I recommend that you complete consultations with affected Canadians in Whitehorse and Old Crow.

Thank you,

ChrisRider
