To Whom This May Concern,

I am writing to urge our government **NOT** to allow drilling for oil or other resources in the **Arctic National Wildlife Refuge**. This land was set aside by the American people for a refuge for wildlife. Drilling there does not solve any actual energy problems confronting us today or the future. If we were to continue to use fossil fuels for energy, there are ample supplies located in already disturbed areas. Our future energy should not be supplied by fossil fuels as it contributes to the rising temperatures of our planet. Once these preserved lands are disturbed, they will not be replaceable so the impacts of this decision is final for the future. This decision is being rushed through which will lead to insufficient planning and potentially disastrous results. Finally, I believe the decision to develop there is not for the benefit of most Americans. It will mostly benefit those who extract the resources and sell it. I am firmly opposed to any resource extraction from the Arctic National Wildlife Refuge.

Thank you,

Raymond P. Sussmann
